EXHIBIT A

GOOD FAITH ESTIMATES

The good faith estimates set forth herein are provided with respect to the Bonds in accordance with California Government Code Section 5852.1. Such good faith estimates have been provided to the District by the Municipal Advisor.

Principal Amount. The Municipal Advisor has informed the District that, based on the District's financing plan and current market conditions, its good faith estimate of the aggregate principal amount of the Bonds to be sold is \$12,190,000 (the "Estimated Principal Amount"). Based on the Estimated Principal Amount, the following good faith estimates are provided:

(a) True Interest Cost of the Bonds. The Municipal Advisor has informed the District that, assuming that the Estimated Principal Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of such estimate, its good faith estimate of the true interest cost of the Bonds, which means the rate necessary to discount the amounts payable on the respective principal and interest payment dates to the purchase price received for the Bonds, is 3.999%.

(b) Finance Charge of the Bonds. The Municipal Advisor has informed the District that, assuming that the Estimated Principal Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of such estimate, its good faith estimate of the finance charge for the Bonds, which means the sum of all fees and charges paid to third parties, is \$449,465, of which \$215,000 is for costs of issuance to be paid from Bond proceeds, \$91,791 is Underwriter's discount, \$62,674 is for bond and reserve surety premiums and an estimated \$80,000 is for fees paid to the Trustee over the life of the Bonds from funds other than Bond proceeds.

(c) Amount of Proceeds to be Received. The Municipal Advisor has informed the District that, assuming that the Estimated Principal Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of such estimate, its good faith estimate of the amount of proceeds expected to be received by the Authority for sale of the Bonds, less the finance charge of the Bonds paid from Bond proceeds, which amount is estimated to be \$369,465, and any reserves or capitalized interest to be paid or funded with proceeds of the Bonds, which is estimated to be \$0.00, is \$13,547,869.

(d) Total Payment Amount. The Municipal Advisor has informed the District that, assuming that the Estimated Principal Amount of the Bonds is sold, and based on market interest rates prevailing at the time of preparation of such estimate, its good faith estimate of the total payment amount, which means the sum total of all payments the Authority will make to pay debt service on the Bonds, plus the finance charge for the Bonds as described in (b) above not paid with the proceeds of the Bonds, calculated to the final maturity of the Bonds, is \$24,410,067 (\$0.00 of which will be paid for from capitalized interest).

The foregoing estimates constitute good faith estimates only. The actual principal amount of the Bonds issued and sold, the true interest cost thereof, the finance charges thereof, the amount of proceeds received therefrom and total payment amount with respect thereto may differ from such good faith estimates due to (a) the actual date of the sale of the Bonds being different than the date assumed for purposes of such estimates, (b) the actual principal amount of Bonds sold being different from the

Estimated Principal Amount, (c) the actual amortization of the Bonds being different than the amortization assumed for purposes of such estimates, (d) the actual market interest rates at the time of sale of the Bonds being different than those estimated for purposes of such estimates, (e) other market conditions, or (f) alterations in the District's financing plan, or a combination of such factors. The actual date of sale of the Bonds and the actual principal amount of Bonds sold will be determined by the District based on the timing of the need for proceeds of the Bonds and other factors. The actual interest rates borne by the Bonds will depend on market interest rates at the time of sale thereof. The actual amortization of the Bonds will also depend, in part, on market interest rates at the time of sale thereof. Market interest rates are affected by economic and other factors beyond the control of the District.
